

WE ARE WHITE VILLE

WATER IS
THE SOURCE OF LIFE
AND THE INSPIRATION
OF OUR WORLD.

White Ville is a city of excellence, a capital of quality and style, where the purity of white and its wholeness joined with the versatility of water and its continuous movement is at the center of our inspiration, driving our strive for innovation and design evolution. Powerful technology deployment, commitment to details and innovation combined with our global experience and founding Group heritage, guide our product development to create holistic bathroom solutions that combine functionality and design in a perfect synthesis of prestige.

WHITE  VILLE

EXCELLENCE IN SANITARY WARE

WE BROADEN POSSIBILITIES

OUR PHILOSOPHY
IS INNOVATION
THROUGH DESIGN
AND WE CREATE
EXCLUSIVE SOLUTIONS
FOR CONTEMPORARY
INTERIORS.

As white contains all other colors, so White Ville proposes a complete range of contemporary sanitary ware collections: from the most innovative models to the smartest solutions, from trendy design to classic models, satisfying every need of excellence for each living style.

WE PURSUE QUALITY

INDUSTRIAL HIGH TECHNOLOGY AND ARTISANAL CARE FOR DETAILS: THE PRODUCTION PROCESS OF EXCELLENCE.

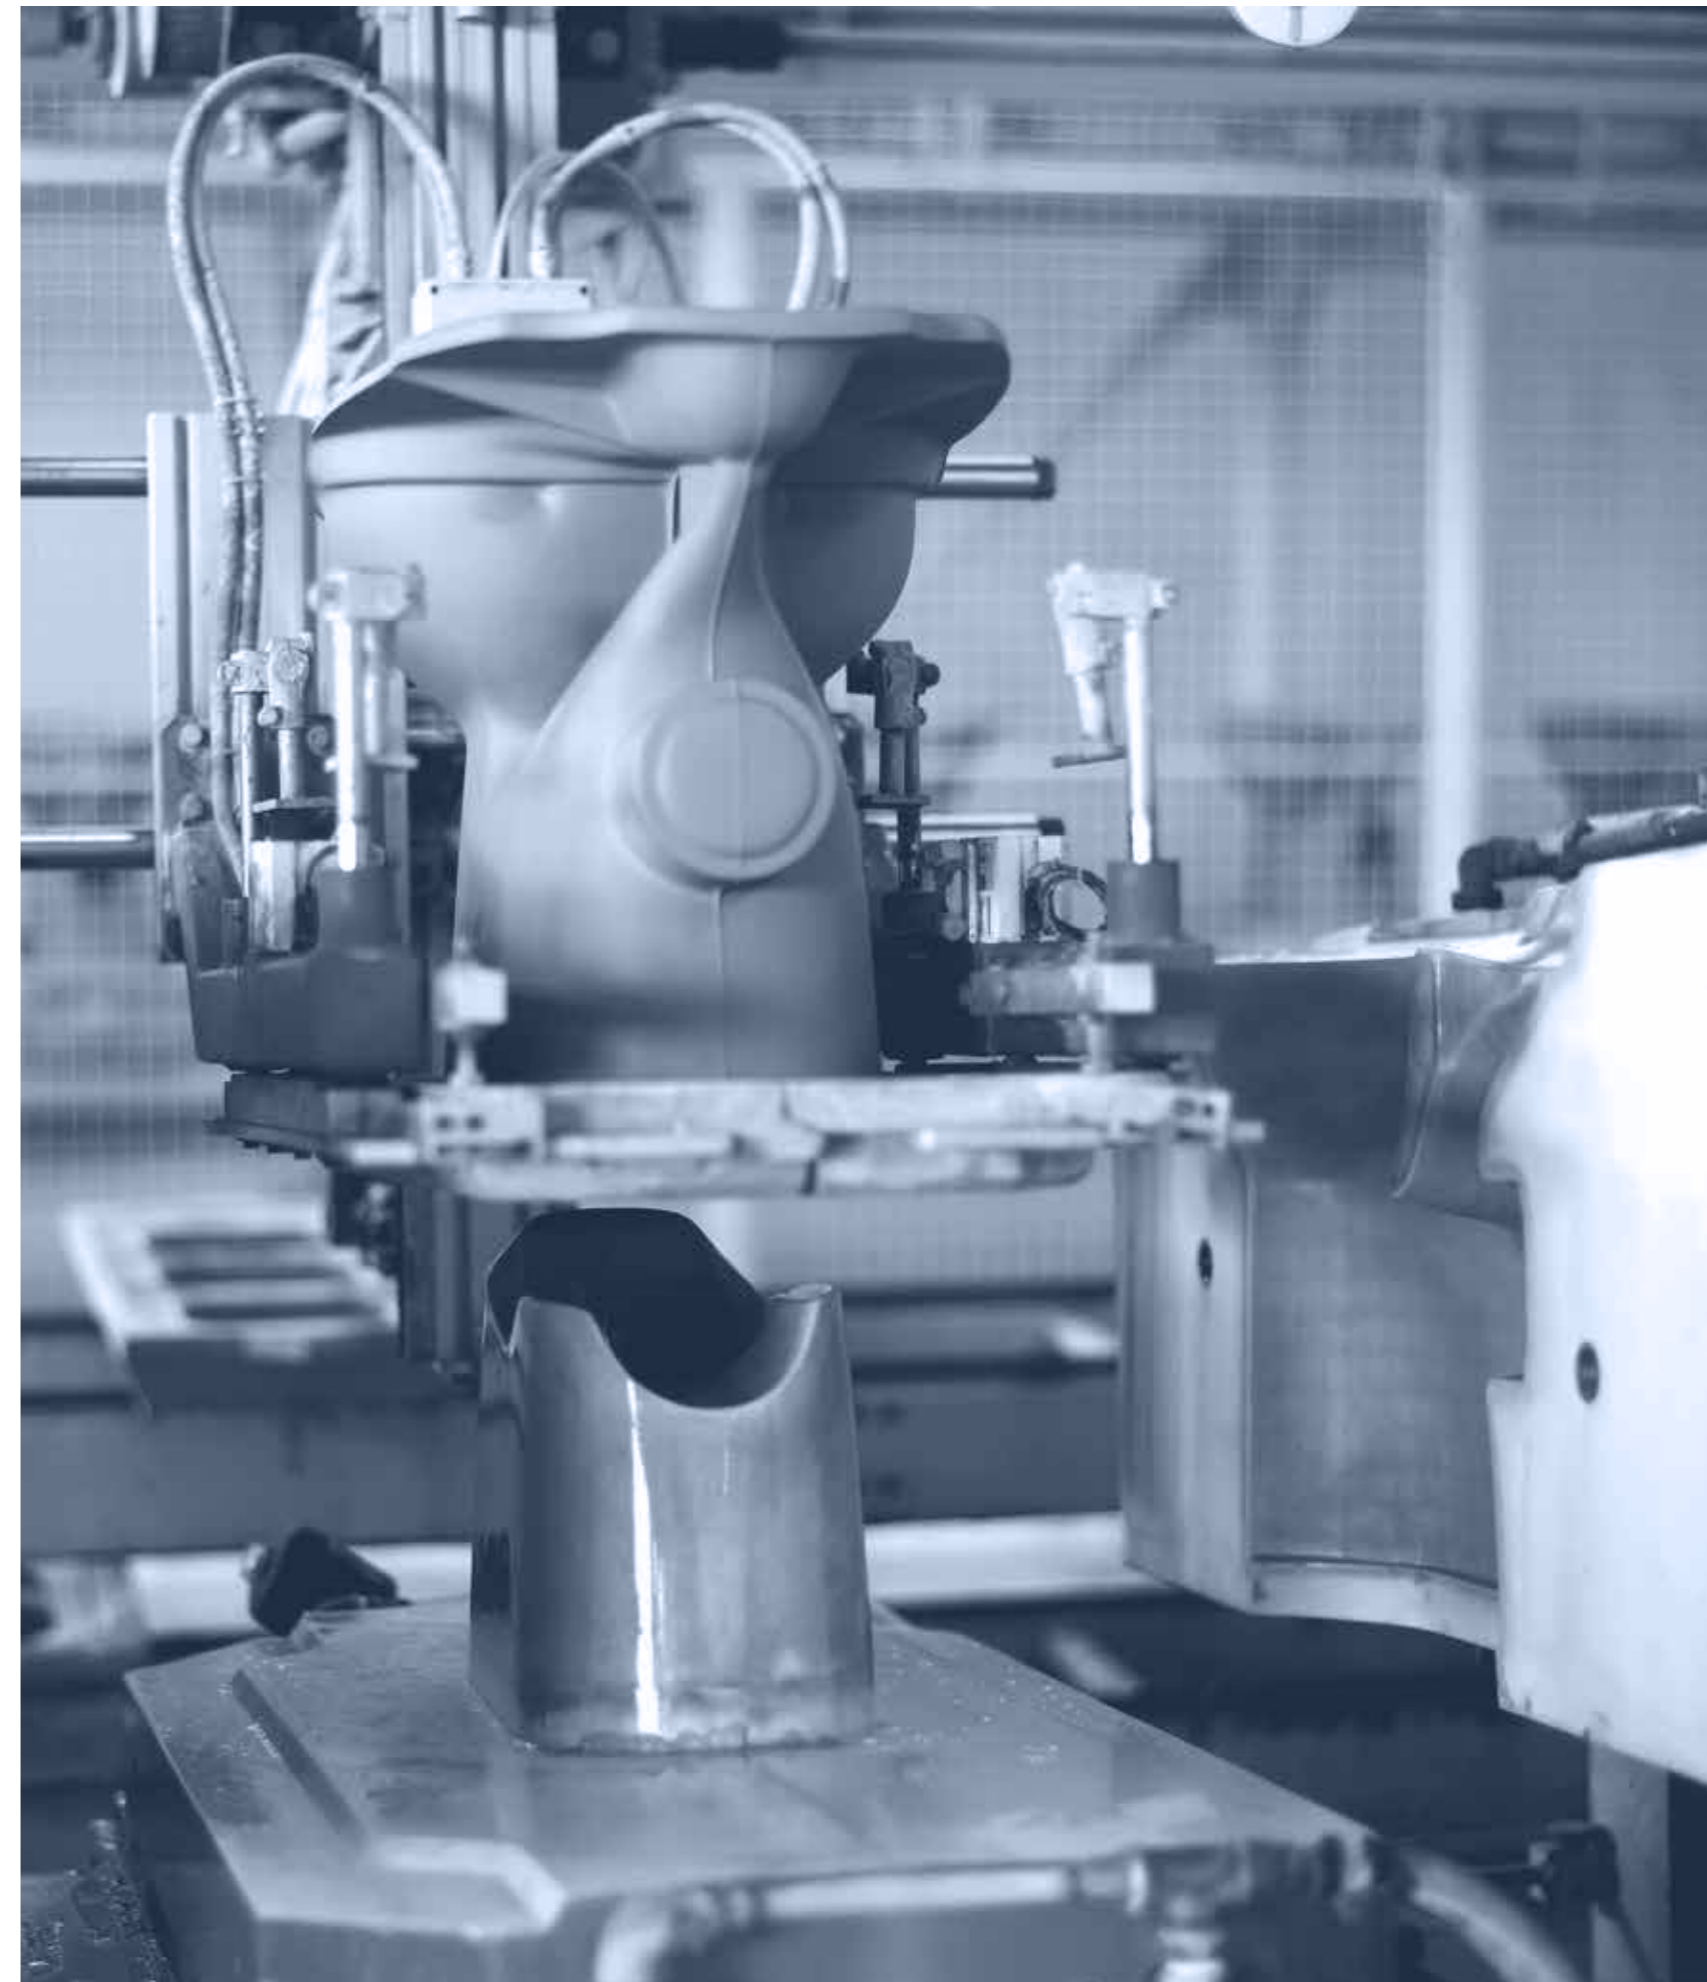

White Ville is a brand of CLEOPATRA GROUP, one of world's leading players in ceramic tiles and sanitary ware production, founded in 1982 and renowned worldwide for the excellence of its product. We have experience in exporting in more than 100 countries over 5 continents with a solid sales network all over the world.

Our sanitary ware production facilities extend on an area of 150.000 sq.m. with a capacity of 2.2 million pieces per year.

We utilize carefully selected premium raw materials to ensure a high quality finish for our products.

We run rigorous checks at every stage of the industrial process, following strict quality control procedures that comply with international standards.

Our production plants deploy the latest high pressure casting technology to ensure scalable production with steadfast quality and optimum energy savings.

WE FOCUS

ON INNOVATIVE DESIGN

WHEN FUNCTIONALITY MEETS STYLE.

For us design is an ergonomic combination of functionality and beauty, not just aesthetics. That's why we have put together a team of international designers, from different cultures and backgrounds, united by the pursuit of innovative and practical concepts for our high quality sanitary ware collections.

1

DAVID EMMANUEL MICHAUD

The love for progress, out-of-the-box thinking ability, passion for style, ergonomics and attention to quality and details constantly inspire the creative brain behind innovative developments for leading companies. The Swiss-French-born, US-raised and Italy-established, Michaud loves a challenge: from sport developments, e-bike, luxury yacht, watches and various consumer goods, he always looks for excellence and style. Involved on many fronts from his consultancy firm to his daily operations as Head of Design and Creative Director at Rudy Project, one of the market leaders in technical eyewear, helmets and sport gear, Michaud holds extensive patents and recognitions worldwide for his designs while achieving company's high performance objectives.

2

NILO GIOACCHINI

All his work is characterized by a concrete, pragmatic attitude to projects, free from any conventionalism in terms of specialization or trends. His studio operates in a variety of sectors from aeronautical interiors to domestic environments with particular skills in sanitary ware design. Over 35 years of professional activity he has worked with the most important international companies and has received recognition including the "National Mobile Fiera Competition" in Trieste, the Bayer Italia Special Award and the Abet Print Award and many mentions at the ADI Compasso d'Oro award. His "Mobile totale" is part of the permanent exhibition of the MOMA Museum of Modern Arts in New York.

3

LUCA CIMARRA

His approach to design derives from an architectural background that focuses on research for the best solutions in terms of functionality and style, never giving up innovation. His skills, confirmed by many projects realized for international brands, are an assurance of quality and style. After the degree in architecture and a long partnership with Italian Paolo Portoghesi, in 2005 he opened his Studio AreA+3 where he took care of many projects of architectural and industrial design for many international brands. He won the Design PLUS 2007 at ISH Frankfurt Messe, selection for the Pulchra competition among the 100 most beautiful objects in the world 2007/08. In 2008 he was nominated for the ADI XXI Compasso D'Oro. In 2009 he won the Dino Gavina Award.

ONE WASHBASIN

FOR EACH
APPLICATION NEED

IN-SET
basins

OVER COUNTER
basins

WITH HALF PEDESTAL
basins

WITH PEDESTAL
basins

A COMPLETE RANGE
OF SOLUTIONS.

Bold geometric shapes and clean, crisp lines is what makes White Ville range of washbasins a sculptural work of art. An array of choices for each model delivers modern functionality, simplicity and warmth to classic and contemporary bathrooms alike. Each washbasin collection with its unique character offers four versions: in-set basin, over counter, with pedestal and half pedestal allowing you to easily achieve a unified customizable look in your bathroom.

WE RELY

ON EXTRA COMFORT

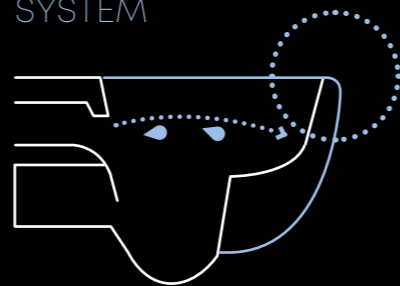

IMPROVING COMFORT THROUGH ERGONOMICS.

We design our products following ergonomics principles to reach a higher efficiency and comfort. That's why the size of our toilet seats and bidet are wider than standards and reach a width of 40 cm. Average people dimension and height are statistically increasing, so we anticipate the need with extra comfort seats.

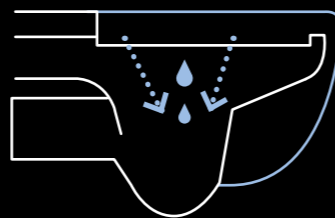

RIMLESS SYSTEM

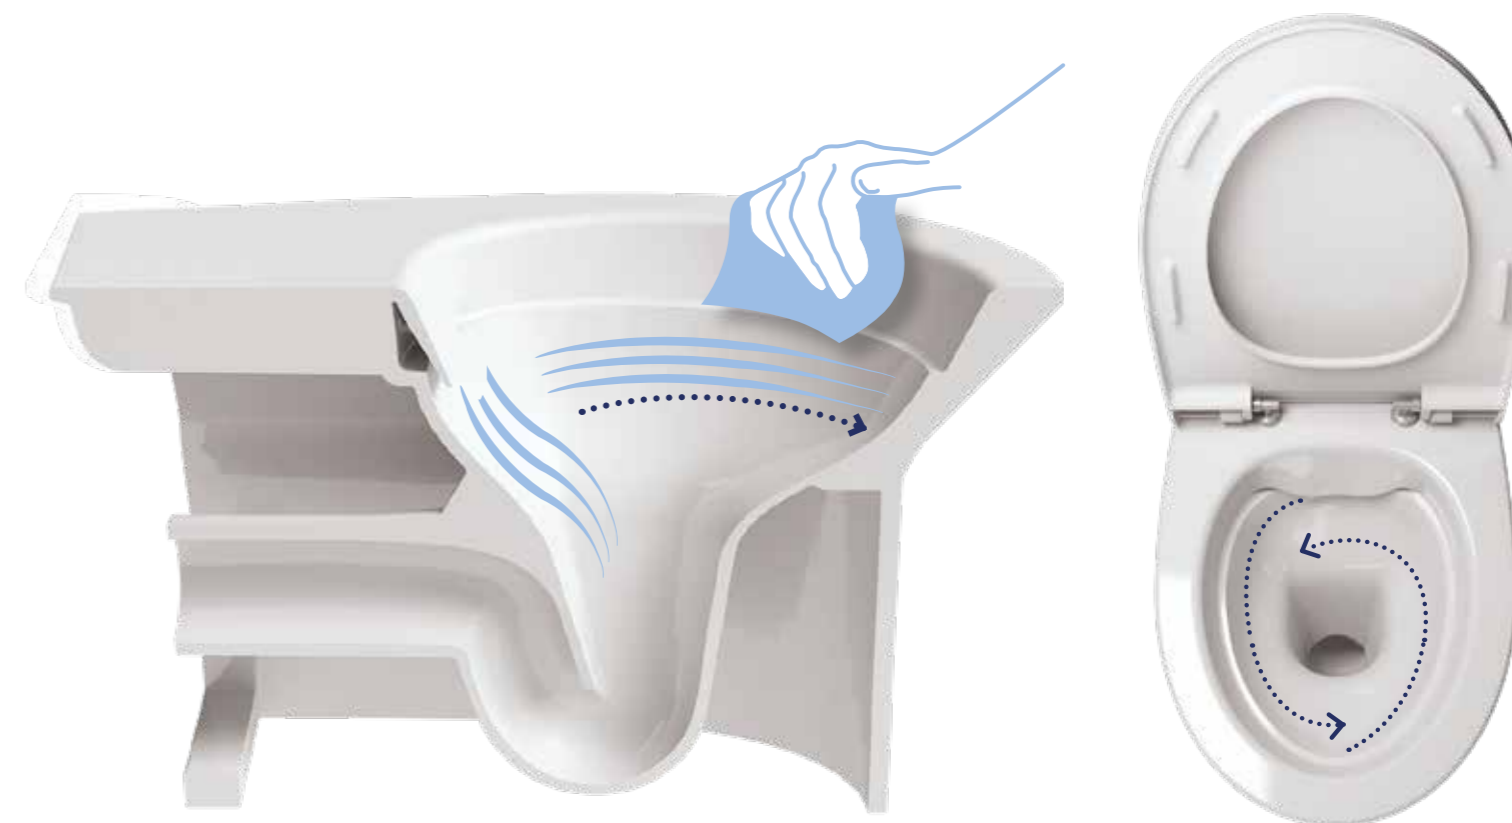

RIM SYSTEM

THE NEW RIMLESS TECHNOLOGY

The rim removal increases the inside surface continuity, thus allowing an easier cleaning. The rimless technology assures better hygienic standards, since every part of WC can be easily cleaned in every part with just a cloth and bacteria and mold cannot grow in hidden areas. The VORTIX® technology optimizes flushing and reduces noise.

The toilet will result functional, water saving and silent at every use. With the VORTIX® system, water flush is powerful and crosses internal surfaces vertically and horizontally, without splashing outside. One or two different nozzles throw out water simultaneously, creating a cleaning vortex effect. Moreover, water consumption is reduced by more than 50% with each flush.

VORTIX® RIMLESS TECHNOLOGY

VORTIX® FLUSH

SILENT

EASY TO CLEAN

HYGIENIC

WATER SAVING

SAVER[®]

WATER SAVING TECHNOLOGY

SAVER[®] FULL FLUSH

Saving water is one of the main goals in contemporary living. One of the simplest way to achieve it is through toilet water.

In normal usage an average flush can use up to 6 liters. With our SAVER[®] technology we can reduce, on tank models, up to 4,5 or 3 liters in full flush and respectively up to 3 or 2,5 liters on a small flush.

This will achieve a total saving up to 50%, reducing general household utility bills and helping save the world's water resources.

The SAVER[®] technology is available in wall hung and floor standing toilets in almost all our collections.

THIN

WITH ELEGANCE

5 mm

THIN EDGES
FOR DURABLE
BEAUTY.

Thanks to our extensive experience with ceramics and the research of the best clays, kaolin and glazes, White Ville can produce extra-slim edge washbasins. Rims thickness can be reduced to only 5 mm, thus enhancing elegance and style, but maintaining solidity and strength. A slim edge is perfect in over counters for an exclusive look in design and deluxe bathrooms.

WE BOOST COLORS

COLOR IS WHAT GIVES JEWELS ITS WORTH.

As colors give prestige and luxury to jewels, so does White Ville color palette; it transforms sanitary ware into precious unique pieces that enhance your bathroom style and beauty.

White Ville collections are available in a full color palette in matt or shiny finish. The chromatic range of ten colors and amazing brilliant gold and silver, are studied to perfectly combine with every style or material: ceramic tiles, concrete, wallpapers, wood, or paint. The matching appeal of White Ville colors is irresistible and frees creativity.

WE SUPPORT

PROJECTS
WORLDWIDE

MEGA-PROJECT VOCATION

INTERNATIONAL CULTURE

White Ville responds to international style needs with collections that fit perfectly in public sectors, private sectors, commercial sectors, hospitality and restaurants.

DESIGN APPROACH

We focus on innovative design. Our international designers create unique collections for functionality and style.

ECLECTIC INSPIRATION

From minimalism to luxury, from classical to contemporary, from smart to trendy: all living styles are represented.

WHITE VILLE FOR PROJECTS

- Wide variety of in-set and over counter washbasins.
- From 40 to 100 cm wide furniture washbasins.
- Extra comfort width of 40 cm for toilets and bidets.
- WC and bidets available in wall hung and floor standing (also with tank) versions.
- Rimless WC: easy to clean, hygienic and efficient thanks to its VORTIX® flush system.
- All WC are combined with Soft-Close seat covers.
- Wide color palette with 10 matt and shiny colors, plus 5 glossy.
- Urinals models are available, complete with dividers.

WHY CHOOSE WHITE VILLE

RIMLESS

The design without rim is more elegant and hygienic: no more hidden bacteria or mold.

EASY TO CLEAN

Rimless means an extreme easy cleaning in every condition of use.

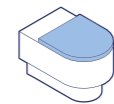

SAVER®

Saving water exclusive technology uses only 3/4,5 liters for full flush and 2,5/3 for half, saving up to 50%.

VORTIX®

A concentrated water flush assures perfect hygiene and cleaning of the WC.

COMFORTABLE SEATS

Sanitary ware are supplied with comfortable and elegant specially-designed urea seats.

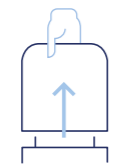

SOFT CLOSE

Seats are available with soft automatic closing. With just a touch you can close the seat without noise.

WIDER DIMENSIONS

For each product category, average sizes are wider than standard and up to 40 mm.

EASY REMOVAL

Easy take off system.

EASY ASSEMBLY

All products are easy to install with hidden fixation system.

WIDE COLOR PALETTE

All products are available in 10 matt and shiny colors plus 5 glossy.

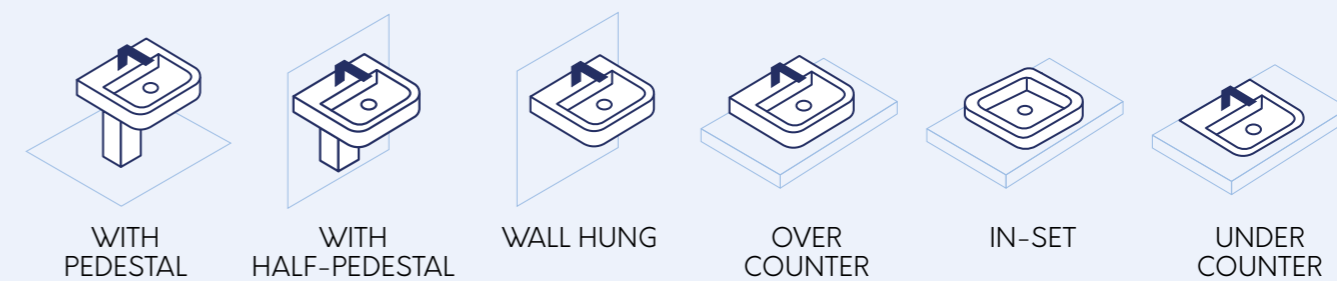

WARRANTY

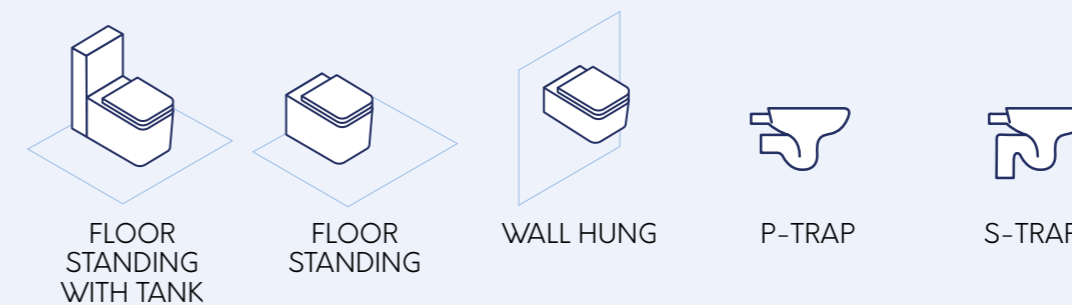

Products have a 10 year full warranty.

SELECTION

WING OPTION

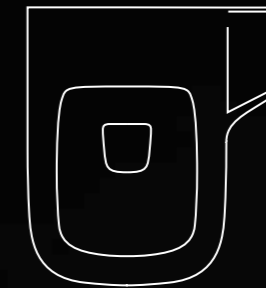

by David Emmanuel Michaud design

The David E. Michaud collection has an absolute and particular innovation: the wing option.

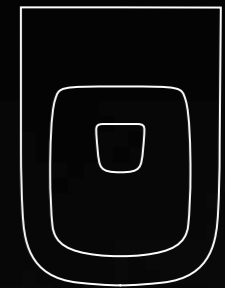

The wing doesn't only hold an aesthetic role, but also a functional one. With its beauty and minimal elegance, it can be used as a support for everyday use objects.

All items of this collection are available with or without the wing option.

URINALS

Urinals are used in public bathrooms such as restaurants, bars, hotels, and airports, so they must be conceived to avoid dirt deposit and minimize bad odors.

The perfect design of the inside allows liquids to flow directly into the sink without any stagnation, making cleaning simple for a spotless hygiene. The easy installation process and the availability of separators make White Ville urinals the best choice for all public applications.
